Dear Glenn,

I am writing this letter for use as a testimonial for Jalite Products.

GENCO continually strives for best practices in all of our business processes. In an effort to provide safe egress routes in each of our facilities, we have decided to use Jalite's US443 exit signs, as our standard, throughout our facilities nationwide. We are replacing all of our existing signs that are made of a polyester film attached to plastic with Jalite's higher quality PVC signs. Jalite's signage demonstrates a much higher luminance than any of the other signs we have seen. Jalite's products also have a much longer life cycle.

The local distributor of Jalite Products, Nextlite, has also proven to be a valuable partner. Nextlite, with our cooperation, designed a new exit sign that far exceeds the requirements set forth by OSHA. We have been very pleased to welcome them as a new vendor.

Respectfully,

Paul Pugliese
Senior Director of Safety
GENCO Loss Prevention

KEEPING GENCO SAFE AND SECURE
